Projects:

Nike Shoes E-commerce store:

A dynamic and responsive E-commerce store utilizing Next.js, React.js, MongoDB, Tailwind CSS and styled components with a RESTful API for efficient server interaction. This is a Full Stack project that contains the back-end that has the admin panel that providing a user interface for managing products, orders, and categories. Additionally, it contains the front-end that has features including product listing, shopping cart functionality, and order processing with Stripe.

Popular Movies Prediction – Data Science Project:

Developed using Python.

In this project, we predict the IMDB score of a movie based on data found on different websites while using Scraping, Data Cleaning, EDA and Machine Learning.

Weather App:

This app was developed using React.js while using OpenWeather API and GeoDB cities API.

The user can select a city in any country and see the forecast for the coming week.
